Dear Hiring Manager or Recruiter,

Thank you for taking a moment to explore my resume. I'm a dedicated **Software Development** at Duoc UC, striving to merge **cutting-edge technology** with practical, high-impact solutions. In my journey so far, I've honed skills in Java, HTML5, CSS3, JavaScript, Spring Security, Spring Boot, microservices and SQL, while actively contributing to **open-source projects** to refine my craft.

My approach is rooted in curiosity, problem-solving, and a constant pursuit of innovation. From building responsive frontends to optimizing backend performance, I thrive on delivering clean, efficient code that elevates user experiences. I also hold a **Tech Developer Certification** from Globant, spotlighting my proficiency in software design, best practices, and deployment strategies.

Beyond technical abilities, I pride myself on strong communication, collaboration, and a **results-driven mindset**. I'm excited by environments that value creativity and teamwork, and I'm eager to bring fresh perspectives that help organizations drive growth.

Thank you for reviewing my background and considering the potential value I can bring to your team. I'm committed to **continuous learning**, excellence, and forging the next wave of digital solutions. Should you have any questions or wish to discuss opportunities, please feel free to reach out.

Sincerely,

Rodrigo Sanchez

Software Development Student
